PROFESSIONAL SUMMARY

Business Intelligence Engineer with 8+ years of global experience translating complex data into business decisions – spanning BI & data engineering, analytics, and data science across Amazon, AstraZeneca, and LatentView Analytics. Specializes in end-to-end BI solutions: Data Modeling, SQL pipelines, executive-facing dashboards and reports. Enables self-serve capabilities by building Agentic AI workflows via effective LLM integration, Prompt Engineering, RAG, AI-ready data pipelines while keeping check on AI Ethics and Explainability. Proven track record delivering \$350M+ in revenue impact and 10x reductions in analysis turnaround time.

TECHNICAL SKILLS

Languages & Tools: Python, R, SQL, Spark, Scala, Excel, MATLAB, MongoDB, HTML, CSS, JS, Kiro, Claude Code

Data Engineering: Amazon Redshift, AWS S3, Athena, Glue, DataCentral, Andes, Amazon Bedrock, Strands, AgentCore

Data Science: Machine Learning, Regression, Clustering, Time Series Forecasting, Deep Learning, NLP, A/B Testing

Visualization: Tableau, QuickSuite, MicroStrategy, Matplotlib, CloudWatch, D3

WORK EXPERIENCE

Amazon – Prime Video | Business Intelligence Engineer | Seattle, USA *Jan 2025 – Present*

- Built an agentic BI assistant (PV Payments BI Agent) on Amazon Bedrock + Redshift, enabling natural language querying across 100+ tables and 120+ metrics – cutting ad-hoc analysis turnaround from 30+ minutes to under 3 minutes.
- Built a public open-source version of this system (InsightAgent) with a live interactive demo, available at my github, demonstrating the core agentic loop on a synthetic subscription payments dataset.
- Created a robust data pipeline for a prediction model on involuntary customer churn; with efficient data enrichment we were able to get to a 93% accuracy – outlining the voluntary intent within involuntary churn as well.
- Built customer churn dashboards slicing across engagement and benefit usage dimensions, reducing deep-dive time from 6–8 hours of manual querying to a few minutes.
- Led 30+ deep dives as SME for PV Payments and involuntary churn, identifying root causes of metric fluctuations and guiding product decisions.
- Delivered 10+ A/B test analyses across comprehensive metric sets; initiatives when scaled contributed ~\$150M in incremental revenue.
- Owned creation and automation of weekly/monthly business review reports, enabling leadership to track core metrics without navigating 10+ dashboards.
- Co-led org-wide AI data agent - defined Knowledge Base structure, selected LLMs, added validation layers, and built continuous test cases; cut typical 4-hour analytical tasks to ~10 minutes.
- Extended the agent with real-time interactive dashboards (HTML + Chart.js), historical conversation retrieval, and a closed-loop feedback system; deployed via Kiro-CLI and AgentSpaces for PM self-service.

Amazon – Relay Mobile CDPT | Business Analyst | Seattle, USA *Jun 2024 – Jan 2025*

- Owned all BI and data work-streams end-to-end for Relay Mobile (Amazon's driver-facing mobile application), ensuring continuous availability of high-fidelity data for business decisions.
- Built data pipelines and curated business logic to score Perfect Execution for vehicle runs in Amazon's Middle Mile network; surfaced workflow gaps to improve driver experience.
- Applied NLP models and sentiment analysis to thousands of driver app feedback entries, establishing a Voice of Drivers mechanism for continuous app improvement.
- Delivered 20+ deep dives across Driver ID & Trust, Fraud Detection, Navigation, and Relay Road Compliance programs – collectively contributing ~\$120M in annual savings and revenue for Amazon.

Amazon – NA Surface Trans | Sr. Financial Analyst | Seattle, USA*Nov 2023 – Jun 2024*

- Served as SME for On-the-Road (OTR) metrics in NA Outbound Linehaul, owning data reconciliation across teams and resolving cost gaps of up to \$60M annually.
- Created a Single Source of Truth for financial data covering ~\$2B in annual spend, eliminating mismatches across reporting structures.
- Automated weekly reports using SQL and Excel, saving up to 12 hours of manual effort per week.
- Led all data initiatives, ETL queries, and Redshift cluster migration for the Outbound Linehaul space.

Amazon – Relay Mobile CDPT | Business Analyst | Luxembourg*Feb 2022 – Oct 2023*

- Assumed full ownership of Relay Mobile Business Reviews (~350 metrics); executed 120+ fixes and updates to maintain reporting consistency.
- Built 160+ SQL queries supporting complex data consumption and actionable insights for stakeholders.
- Owned 40+ Tableau dashboards in the Relay Mobile Alchemy library; established governance guidelines differentiating official from ad-hoc dashboards.
- Created a data dictionary to reduce tribal knowledge risk and promote a self-service analytics culture across the team.

Amazon – EU ATS | Business Analyst | Luxembourg*Apr 2021 – Feb 2022*

- Owned the ATS Standby Program end-to-end, including Peak 2021 strategy and published an internal whitepaper on process design.
- Drove 55% YoY cost reduction in the Standby program (€21.1M → €10.3M) through improved estimation methodology and streamlined process flows.
- Standby trucks saved 9.1M packages during Peak 2021, contributing 1.5 bps uplift in pan-EU DEA savings (~\$7M).
- Automated weekly SB estimation and tender file creation using Python & Excel; automated WBR reporting saving 3 hrs/week.

AstraZeneca | Business Partner – Operational Excellence | France*Feb 2020 – Oct 2020*

- Analyzed and reported sales performance across territorial levels; automated multichannel activity tracking using MicroStrategy.
- Devised incentive schemes for field sales teams based on performance data; analyzed Covid-19 impact on sales and digital activity.

AstraZeneca | Data Science & Business Analyst Intern | France*Jul 2019 – Dec 2019*

- Applied K-Means clustering and weighted scoring to improve Healthcare Account targeting, driving more effective campaigns.
- Analyzed Key Opinion Leader networks using PubMed publication data and optimized HCP targeting against internal databases.
- Performed Granger-causality time series analysis on sales KPIs to model correlation and causation patterns.

Latentview Analytics | Data Analyst | Chennai, India*Nov 2016 – Jun 2018*

- Built predictive models forecasting defect and breakdown patterns by correlating vehicle telemetry with warranty data for BMW AG group
- Developed a scalable self-service real-time analytics tool using React JS, Apache Spark, and Scala Play – delivering 35% cost savings on warranty claims.
- Segmented driving profiles using Spark MLlib clustering to associate breakdown patterns with driver personas and customize warranty packages.

EDUCATION**ESSEC Business School & CentraleSupélec***2018 – 2020**Master's in Data Sciences & Business Analytics (Major: Data Science & Business Analytics) | France***Anna University***2012 – 2016**Bachelor of Engineering – Mechanical | Chennai, India*

HONORS & ACHIEVEMENTS

- NASSCOM AI Game Changer Award 2018 – recognized as one of the best Advanced Analytics Projects (Smart Insights).
- Spirit of Latentview, Encore, and Spot Awards at Latentview Analytics for outstanding individual contributions.
- Amazon Shout-outs (Stakeholder Feedback verbatim):
 - *“Amazing work delivered on Peak Preparation on Standbys. Deepak really insisted on the highest standards by streamlining the Planning Methodology, Sourcing Process, Execution, coordinating efforts across the different teams and leading overall strategy! Thank you for your contribution and improvements driven YoY and for ensuring best Customer Protection that will guarantee a successful Peak!”*
 - *“Deepak, I would like to express my sincere appreciation for your exceptional ownership, in-depth analysis, and inventive approach over the past week. Your efforts in identifying the root cause and determining the impact of the recent issue following the renewal migration were truly remarkable. Your dedication and willingness to go the extra mile were instrumental in not only obtaining the impact data but also in proactively gathering configurations that would provide a comprehensive understanding of the impact across all countries. I am immensely proud to have such talented individuals on our team.”*
 - *“For the JP Points launch, Deepak went above and beyond to deliver compelling data cuts beyond the PO requirements, finding a way to pull this in despite PV never having integrated with Points before. Deepak's analysis told a compelling story about the early success of the launch, which has increased business leadership excitement about further investment in the program. When the results came in stronger than expected, Deepak went deep to cross-validate the results with engineering metrics to confirm the accuracy, holding a high bar for data quality. Thanks, Deepak, for the strong ownership and deep dive. As the launch results settle, I'm excited to collaborate and learn more about how customers use Points and the impact on the JP TVOD business.”*
 - *“Deepak! Wow, your Driver Load Dashboard is simply amazing. It's going to help the Relay Beta app launch SO much! Thank you for owning this and building it so quickly. You have no idea how much time you saved the team. Thank you for responding so quickly to the requested add-ons as well. Simply fantastic!”*
 - *“Thank you for your contribution making our DEA performance better one stand by at a time. It was a pleasure working with you and I'm looking forward to the challenges 2022 will bring us. I'm particularly glad for your openness and excitement to improvement suggestions. Great job.”*

ADDITIONAL

Languages: English, French, Tamil

Mentoring: Group Manager for an 8-person Amazon MatchUp group; onboarding buddy and mentor for multiple new hires

Interests: Music - headed Music Clubs at university and workplace; member of ESSEC Music Association (JAM ESSEC)
